REMARKS:

- All applications listed here are only available for 2wd model unless specified otherwise in the listing.
- The symbol "®" means this kit is supplied with a pair of remote adjuster cables.
- Due to longer strokes for fronts and rears, actual ride height are up to models and it doesn't go as low as they are for kits of dynamic pro sport version.
- Lowest setting for ride height of 1-WAY drift type is 1.5cm for distance between tires and fender.
