REMARKS:

- All applications listed here are only available for 2wd model unless specified otherwise in the listing.
- The symbol "®" means this kit is supplied with a pair of remote adjuster cables.
- The price quoted is subject to fluctuations of the market. Any change in prices will be notified to Dealers and Distributors in writing format with the prior notice of thirty days.
- The standard setup is **hardened rubber upper mount (R/U)** for MacPherson strut type suspension if customers do not specify before securing the order. However, customers now could choose to have P/U* (pillow ball upper mount) for MacPherson strut type suspension with **ZERO** additional costs incurred.
- There is noise upon coilovers with pillow ball upper mounts. This is normal and will not affect coilover function or cause any safety issues. Please make sure customer can accept the noise before placing any orders. Yellow Speed Racing does NOT provide any warranty, replacement parts, or product return for noise issues for Dynamic Pro Sport (inverted) version coilover kits
- For any application with orange background, it means this choice for rear pillow ball upper mount upgrade DOES NOT require additional cost.
